- Video game speedrunning
- Music
- Video editing
- Moderation
- Coding

Certifications

Describing Azure completed in 2023
AWS Getting Started in 2023

All my certifications can be seen in my LinkedIn profile.

Curriculum Vitae

I am a 22-year-old engineering student at the JAMK University of Applied Sciences in the field of information and communication technology (ICT), specializing in data analytics and AI. I am actively looking for job opportunities, which I hope can improve my proficiency and work experience in the field. I have been described as analytical, improvement-oriented and able to reflect on my own work and take in feedback.

ICT is a passion of mine, and I have studied programming extensively as part of my studies. I hope to deepen this knowledge as part of the workforce and apply what I have learned in actual projects.

My goals are to graduate and get work in my field, especially in AI, which I see as a quickly evolving and boundary-pushing field. I want to be at the forefront of this development. I work efficiently on my own, but I am also a team player, as I can voice my opinion clearly and constructively. I am a fast learner, and I adapt quickly to new challenges.

Education

My job mainly consisted of cleaning and assisting with guiding children.

Language skills

Finnish – Native language
English – Excellent
Swedish – Good
Russian – Basics

Other skills

Small-scale esports production – Excellent

Having done speedrunning as a hobby for 9 years and achieved many world records in the process, I have participated in, and helped produce many successful community events. Over the course of my involvement in a community based around speedrunning LEGO-games, we have managed to raise over \$10,000 USD total to several different charities. My role has been largely on the side of content production, having done commentary work, and content using OBS, Twitch, YouTube and Davinci Resolve. Additionally, speedrunning has improved my ability to present myself, work together with different kinds of cultures and personalities and has made me excellent at handling pressure.
