PROFILE

ICT engineering student finishing a thesis in autumn 2026, with recent software development internship experience at EXEN esports Oy. Builds and improves practical systems across software, web, tooling, technical reporting, and live production. Best suited for scoped project work where unclear technical problems need to be broken into workable parts, supported with careful AI-assisted workflows across tools like ChatGPT Codex, Claude Code, OpenClaw, and OpenCode, and turned into useful, tested, understandable results. Evidence for pressure management includes leading live esports production, doing speedrunning as a hobby, and handling complex internship projects involving auditing, restoration, testing, and hosting research.

SELECTED EXPERIENCE

Production Manager

NUKE-Liiga · Hybrid · Jun 2025 – Present

- Led broadcast preparation, technical execution, and in-game camerawork for a Finnish youth esports league.
- Coordinated with casters, graphic designers, admins, and other stakeholders to deliver live broadcasts.
- Improved production consistency in season two; now managing NUKE-Liiga's third season.
- Interviewed and oriented an assistant producer while retaining responsibility for live technical delivery.

Software Development Intern

EXEN esports Oy · Jyväskylä / Hybrid · Jan 2026 – May 2026

- Used AI-assisted workflows across application development, technical planning, audits, WordPress/PHP work, and partner projects.
- Audited EXEN's website, produced a structured issue report, updated WordPress content, and implemented source-level PHP/WordPress improvements.
- Researched CI/CD, cloud-hosting options, and technical tradeoffs for project decisions.
- Investigated, tested, and restored an inventory-management system for an EXEN business partner, helping move it toward a demonstrable product.

ADDITIONAL EXPERIENCE

Retail Store Worker

ABC Hirvaskangas · Hirvaskangas · Summer 2022

- Shelving, storage, and dishwashing.

Additional early summer work experience in retail, municipal youth-work assistance, and care support available on request.

EDUCATION

Bachelor's Degree Programme in Information and Communication Technology

JAMK University of Applied Sciences · Jyväskylä · Aug 2022 – thesis planned for autumn 2026

- Focus areas include practical software development, data analytics, AI, and full-stack development.

High School Diploma

Äänekoski Upper Secondary School · Äänekoski · Aug 2019 – Jun 2022
